

Covered Employment and Wages by Industry and County

Employment and Payroll under the Texas Unemployment Compensation Act

Description of the Data

This publication contains employment data, payroll data, and average weekly wages by county for the specified quarter. These data were compiled from quarterly employment and wage reports submitted by employers subject to the Texas Unemployment Compensation Act. Quarterly average employment data have been tabulated by industry according to the North American Industry Classification System (NAICS) Manual (see Industry Classification below) on a statewide and county basis. Payroll data represent the total wages paid by the establishment during the quarter. Total wages are provided for each county and by industry for the state. Average weekly wage data are computed from employment and total wages reported by all establishments as well as just those establishments subject to the Texas Unemployment Compensation Act. Average weekly wages are not to be confused with "prevailing" wage rates in various industries.

Industry Classification

Beginning with the release of first quarter 2001 data, industry information is provided under the new North American Industry Classification System (NAICS). This represents a major departure from the Standard Industrial Classification (SIC) system of identifying industries in use in the U.S. for many decades. Among other things, this coding change makes possible the direct comparison of employment data between the United States, Canada and Mexico. The new system also takes into account the transformation of the economy from a goods producing system to one that is more service based. In addition, changes have been made in order to improve industry detail, coverage, definitions, and to better clarify classification concepts and the classification of individual activities. The NAICS coding scheme is **NOT** comparable to the SIC coding scheme at any level, except at the County total employment level.

Definition of covered employment, wages, and average weekly wage

Covered employment is the number of workers employed by employers subject to the Texas Unemployment Compensation Act during the pay period which included the 12th day of the month. Excluded from coverage are employment covered by the Railroad Retirement Act, self-employed, and unpaid family members.

The payroll data (total wages) used in this publication includes all wages and salaries paid to covered employees by their employers including bonuses, commissions, and cash values or remuneration received in any medium other than cash. The wages include both taxable and nontaxable wages.

The average weekly wage is the numeric calculation of total wages for the county divided by the number of employees in the county, divided by the number 13 (the weeks in a quarter). This figure is listed in Table 3 for those establishments that are covered by the Texas Unemployment Compensation Act, and for all employers (those covered plus Federal Government employment).

NAICS Industry Structure

The NAICS industry hierarchy classifies data to the six-digit level. The first level consists of the Goods Producing and Service Producing Clusters. Below this is the Super Sector Level. The third layer is the Sector level. Data for the State of Texas is published at both the Super Sector and Sector levels. Data for the 254 Texas counties is published by ownership at the Super Sector level only.
